

Versatile functionality for hoist and plow control

Designed as cost effective alternatives, Certified Power Solutions offers hydraulic valves that can be controlled electronically, pneumatically (air) or manually (cables) for typical plow control operations. Traditional control options fit the cost and service consistency needs of your fleet.

Lever (Air) Controls

- Proportional (feathering) control of device
- Ability to stack valves into banked package
- Single- and dual-axis functions
- Various handle bends for access
- Detent, center lock and posi lock available
